

*The Tonya™ is
more than a lift...
It's great fun!*

The Tonya™ Lift

Motorized Patient Positioner in the upright position.

The Tonya™ is More Than a Lift, it's Great Fun!

All of the children who use the Tonya™ lift love its multi-colored frame and many refer to its blue lifting arm as an "elephant's trunk". The lift itself has a gentle, playful appearance that is usually not found in other lifts. The Tonya™ is a versatile lift that can be used for most lifting situations, in a variety of settings. For example, it can be taken outside for a picnic and used to play with in the grass. It is so safe and easy to use that even your child's friends can operate their new "flying machine".

We offer the largest selection of personal lifting systems. Our products include:

- Portable Ceiling Lift
- UNILIFT® Ceiling Lifts
- Stretcher Lift
- Lexa™ Lift
- Diana™ Lift
- Raisa™ Lift
- Digital Scale for Lifts
- Sling Systems

The Tonya™ Lift

Very similar to our Diana models, the Tonya™ Lift was especially designed for pediatric use. Built with a slightly smaller frame and Patient Positioner, kids love to be lifted with the Tonya™. Not only is the appearance of the Tonya™ fun for a child, the lift itself is built for safety and reliability. Equipped with a number of safety features, the Tonya™ can lift up to 350lbs. With its easy grip handles and 4 inch wheels, it is easy to maneuver around the house. The Tonya™ also has a leg spreading feature, which enables one to easily lift a child out of or onto a chair or toilet.

Positioning with the Touch of a Button

The greatest feature of the Tonya™ Lift is its standard, Motorized Patient Positioner. With the Patient Positioner, the caregiver can reposition the user into varying degrees of reclined or upright, seated positions while being lifted. The Motorized Patient Positioner developed for our Pediatric Tonya™ Lift is smaller than our standard Patient Positioner, which is used for our Lexa™ and UNILIFT® models. The smaller Patient Positioner enables the sling to better conform to children, ensuring safety and comfort.

Specifications:

- Base Length: 44 inches
