## LEXA

### A multi-talent for careful transport of patients

The Original LEXA lift is an absolute multi-talent among lifts. It is a very comfortable belt lifter, which, due to its swivel spreader bar, has many capabilities and applications. For instance, it can easily take up patients sitting, lying, or from the floor and move them easily and safely to a sitting or lying position – so they can be transported gently and comfortably to the toilet, to the wheelchair, or to the bed. The sway-free transport also conveys a feeling of security. The LEXA lift is available with a wide variety of slings; it can be used both with loop slings and with 4-point clip connectors.

- › Spreadable base in three positions to receive the patient from the wheelchair;
- › Electric lift motor;
- › IBS – Intelligent Battery System;
- › Effortless, smooth, safe transport thanks to smooth-running casters;
- › Lockable casters;
- › Versatile sling program for the widest variety of applications;
- › Lifting capacity 440 pounds
